

John Schmitz - Select Energy Services

Today, Select Energy Services is headquartered in Houston, Texas and has grown to become a company with over \$800 million in revenues and nearly 5,000 employees. We provide services to more than 400 customers in every major shale play throughout the United States and Canada. We deliver innovative and efficient end-to-end water solutions to oilfield operators.

Judge's Comments:

“ This company's work and accomplishments in the area of strategic water management solutions makes them stand out in this category, in large part because of the essential importance of wastewater treatment (in particular, with regard to reuse in hydraulic fracturing operations) across the entire upstream/production side of the petroleum industry.

“ Addressing both practical (economic/technological) and political concerns related to water usage, their onsite sustainable water program utilizing Chlorine Dioxide to oxidize iron ions out of solution, destroy H₂S and sterilize water fulfills the judging criteria in this category.

At Select Energy Services, we're dedicated to providing our customers with an arsenal of efficient and environmentally conscious water solutions to service the full life cycle of the well. We accomplish this through the unique capabilities of our three business units – Water Solutions, Fluid Handling, and Well Testing. Select Energy Services is geographically positioned to provide customized solutions to the unique requirements of every basin. Select's robust range of services provide our customers with one

source to keep their operations moving and on time—and more importantly, allow them to focus on their objectives and do what they do best. At Select Energy Services, we pride ourselves in being a trusted partner that offers comprehensive approaches for more convenience and better results.

Finally, we at Select Energy Services believe our true value lies within the hard work, proven experience, safety and customer-centric solutions we are able to bring to each and every job or project.
