

Willbros

Willbros Engineers is a business unit of Professional Services, a Willbros business segment. Willbros is a specialty energy infrastructure contractor serving the oil, gas, refinery, petrochemical and power industries.

Judge's Comments:

“ Recognized for completing construction projects under challenging circumstances, in remote locations and in difficult environments. Wide array of construction capabilities in oil and gas, the addition of Intergra Link is a smart way to further support clients and manage the future construction and maintenance business.

“ Remote monitoring capabilities are important as infrastructure grows. Good to know that the usability of the product requires little to no training with experience of far more complicated systems.

The Company's offerings include: engineering, procurement and construction (either individually or as an integrated EPC service offering), turnarounds, maintenance, facilities development and operations services.

Professional Services is headquartered in Tulsa, Okla. The segment operates from hubs in Houston, Texas, Kansas City, Mo., Denver, Colo., and Hauppauge, NY,

to provide capabilities including: upstream, midstream and downstream engineering; integrity management, field services; and land and survey offerings. Professional Services has the expertise, experience and depth of knowledge to assist with every aspect of the pipeline infrastructure industry.
